

QUALITY POLICY

ABANZA Tecnomed specializes in the innovation and development of medical devices and surgical instruments and, biomedical research in the field of Sports Medicine. The company's objective is to guarantee the maximum quality of the developed products and the customer's satisfaction, ensuring trustworthiness with our suppliers and effectiveness in resources management. To this end, ABANZA incorporates a Quality Management System throughout the value chain that, allows us to comply with the requirements of the medical device world as well as with current legislation and achieve our objectives.

The company's goal is to exceed our customers' expectations by striving to deliver an excellent product's quality and user's experience, with a focus on the full confidence of surgeons, patients and hospital systems through effective, safety and agile processes.

The Management Board, in its commitment to the process continuous improvement of products and processes, health safety, and to increasing the level of safety, health protection and worker's satisfaction, allocates the necessary technical, financial and human resources. It also establishes and periodically reviews measurable objectives and targets consistent with this policy.

Our company considers the commitment of all the people in the organization to be essential, contributing their creativity and professionalism. For this reason, the company will provide its employees with the appropriate means to encourage consultation and participation in the appropriate management of Quality, Health and Safety, the Environment and the Occupational Risks Prevention.

The Management of ABANZA Tecnomed reaffirms its commitment to these business principles and undertakes to ensure their communication and effective application, reviewing their content annually, promoting continuous improvement and adapting them to the new needs detected.
